

THE ENGINE OF THE FUTURE IS HERE TODAY

MAXIMUM FULL LOAD GOVERNED SPEED = 2100 RPM
 MAXIMUM NO LOAD GOVERNED SPEED = 2375 RPM
 ENC 428 C-79

MODEL: 8M9-400

NEW MACK 1000 V8

MIGHTY 400 MACK HORSEPOWER
 For the first time in Australia, there's a big engine with a pedigree. A born and bred Mack V8 16.4 litre air to air intercooled diesel. This engine has the highest torque in the business of 1520 lbs ft (2061 N-m). That means more pulling power, more staying power. And like all Macks, the economy is standard, the durability is proven.

REMARKABLE FUEL SAVINGS
 Mack engine economy is legendary. It's achieved by high volumetric and thermal efficiency. That means we're squeezing maximum power out of every drop of fuel. The Mack 1000 is downright stingy in this department.

HIGH POWERED CUSTOM BUILDING
 The choice is yours. If you need a high speed overrigger, then Mack will team the 1000 at 2100 RPM with a 5/6 speed Maxitorque transmission. That's a combination that really delivers. Less shifting, faster acceleration, higher average road speeds, remarkable fuel savings.
 If you're into heavy haulage with a high gross combination mass, then Mack will team the 1000 at reduced RPM with a 10, 12 or combination transmission. Whatever your need, Mack will custom build to satisfy.
BIG POWER TRAIN WARRANTY
 All Mack diesel engines and transmissions now receive a basic full warranty on parts and labour coverage for 24 months or 161,000

kilometres, whichever comes first. Plus there's an extended component coverage to 36 months or 483,000 kilometres — for cylinder blocks, crankshafts, cylinder heads, connecting rods, camshafts, timing gears and transmission cases. That's really putting confidence in writing.

PEDIGREED POWER, THE LEGEND CONTINUES
